### **EXAMINER'S AMENDMENT**

1. The amendment after final rejection, filed 23 February 2009, has been entered. Claims 2 - 97, 99, and 101-102 are canceled; claims 98, 100, and 103-104 are pending.

### ***Information Disclosure Statement***

2. Initialed and signed copies of previously-submitted information disclosure statements are enclosed herein. All references previously indicated as considered have been considered. In addition:

Reference 569 on the IDS filed 23 May 2005 has been considered. It was not previously considered.

Reference 424 on the IDS filed 12 April 2004 has been updated; the publication year (2000) of the fourth edition of Immunology has been added.

Reference 838 on the IDS filed 20 July 2007 has been updated to indicate that no publication date or year was submitted by applicant. Thus the examiner is unable to determine if the reference constitutes prior art.

The IDSs filed 12 November 2007, 28 August 2008, 29 August 2008, and 3 October 2008 were all previously considered in their entirety. However the statement "ALL REFERENCES CONSIDERED EXCEPT WHERE LINED THROUGH" did not appear on every page. For the sake of completeness, the signed and initialed copies of forms 1449 are included, with each page appropriately stamped.

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification:

At p. 1 line 1, the title has been deleted and replaced with - - Methods of screening antibodies for inducing clearance of beta amyloid - -

Art Unit: 1649

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shaffer et al. 1995 (Neurobiology of Aging 16:737-745). The reference teaches the steps of contacting a monoclonal antibody, specifically 4G8 which binds to an epitope within residues 17 - 28 of A $\beta$  (see Jung 1996 Journal of Neuroscience Research 46:336-348, in particular p. 337 last paragraph), with an amyloid deposit of A $\beta$ , and also separately teaches determining the amount of A $\beta$  remaining in medium after the A $\beta$  deposit has been incubated with microglia (see for example Figure 1 and paragraph spanning the two columns of p. 739). However Shaffer does not teach combining the antibody with the deposit and then combining both with microglia, as encompassed by claim 98 and 103, and does not provide guidance to choose an antibody that binds to an epitope within residues 1 - 7 of A $\beta$  as required by claim 98.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL KOLKER whose telephone number is (571)272-3181. The examiner can normally be reached on Mon - Fri 8:30AM - 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Stucker can be reached on (571) 272-0911. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
